## INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/18666

A. CLASSIFICATION OF SUBJECT MATTER  IPC(7) : CO7H 21/04; C12N 15/74  US CL : 536/23.5; 435/320.1  According to International Patent Classification (IPC) or to both national classification and IPC			
B. FIELDS SEARCHED			
Minimum documentation searched (classification system followed by classification symbols) U.S.: 536/23.5; 435/320.1			
Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched			
Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)			
C. DOCUMENTS CONSIDERED TO BE RELEVANT		6.1 1	Relevant to claim No.
Category * Citati	Citation of document, with indication, where appropriate, of the relevant passages		Relevant to claim No.
and assoc Septembe	t al, Human endogenous retrovirus protein iates with the promyelocytic leukemia zinc r 2000, Vol. 19, No. 38, pages 4328-4336 -8 of first full paragraph.	finger protein, Uncogene U/	1-4
			,

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/18666

This International Search Authority has found 3 inventions claimed in the International Application covered by the claims indicated below:

Group 1, claim(s) 1-4, drawn to a nucleic acid vector encoding a selectable marker and comprising a sequence encoding a HML-2 subgroup polypeptide operatively linked to a promoter.

Group 2, claim(s) 24-28 drawn to a virus like particle comprising HML-2 gag polypeptides, and a first method of use as a medicament.

Group 3 claim(s) 29, drawn to a second method of use of a virus like particle comprising HML-2 gag polypeptides, as a diagnostic.

1. This International Searching Authority considers that the international application does not comply with the requirements of unity of invention (Rules 13.1, 13.2 and 13.3) for the reasons indicated below:

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Independent claim 1, drawn to a nucleic acid vector encoding a selectable marker and comprising a sequence encoding a HML-2 polypeptide operably linked to a promoter is anticipated by Boese et al (Oncogene 19:4328-4336, 2000) who taught expression vectors comprising each of HML-2 env. gag, and cORF, as well as a neomycin phosphotransferase expression cassette. See abstract and page 4334, column 1, lines 1-8 of first full paragraph. As such, there can be no special technical feature, under PCT Rule 13.2, linking the claimed inventions.

Regarding groups 2 and 3, 37 CFR 1.475(b) allows for the combination of a composition and a first method of use, but does not allow for combining a second method of use. In this case, the first method of use of the virus like particle is as a medicament in the treatment of disease and the second method of use is in diagnosis of disease.

Form PCT/ISA/210 (second sheet) (July 1998)

## INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/18666

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)			
This international report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:			
1. Claim Nos.: because they relate to subject matter not required to be searched by this Authority, namely:			
2. Claim Nos.:  because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:			
3. Claim Nos.:  because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule  6.4(a).			
Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)			
This International Searching Authority found multiple inventions in this international application, as follows:			
1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.			
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite			
payment of any additional fee.  3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:			
4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: 1-4			
Remark on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.
